1. Context

This document contains the Release Notes for Loree (Release 1901.2) for Canvas LMS

2. Document History

Release #	Date of Release	Authored By	Reviewed By	Approved By	Summary of changes
1901.2	28-Jan-2019	C.S. Ramamurthy / Dinesh Kumar	Raja	Eddie Cejvan	Release notes for Release 1901.2 of Loree

3. Introduction

3.1. Purpose & Scope

This is the first major release of the Loree to the production environment. The scope of this release will be a fully featured release (encompassing all features currently being used in the staging environment) for all intended users of the Loree tool. For more details on the product features that forms a part of this release, refer section 4

3.2. Release Version

Loree Version 1901.2

3.3. Environment

1. Environment	Desktop web-based tool for Windows and Mac PCs / Laptops
2. Supported Browsers	Safari (Mac only), Chrome, Firefox
3. Pre-Requisites	Valid Instructure-Canvas license

4. Release Details

4.1 Release Features

S. No	Features / Enhancements	Purpose
1	OAuth verification	This allows the users to login using access token for robust authentication and security
2	Editor / Designer Views	This allows the users to perform various tasks based on the privilege. The designer view gives access to all features whilst the editor view provides a restricted access to some of the key features only
3	Content Creation and formatting Tools	This includes placeholders for adding image, videos and text content along with associated set of tools for formatting the added content (to enhance user experience)
4	Sharing templates and blocks	This allows the users to share their template / blocks with users of other departments. This feature is specific to admin and course designer only. An email flyer is triggered upon sharing the templates
5	Canvas Shell Pages and Modules Link	This allows the users to link canvas pages and modules (embedded as a link) inside the course content created using the Loree
6	Real-time Word Count / Word Restrictions	This allows the user to view the real-time word count for the selected block and the page. Additionally, there is a restriction placed on the maximum number of words that can be entered.
7	Image Upload	This allows the user to upload their preferred images for the respective courses. The images will be saved as part of canvas course itself
8	Image view / retrieval	This allows the uploaded images to be viewed and added to the course content through a separate image selection dialog.
9	Export / Import Code	This allows the users to export the code (HTML / CSS) as a zip file to perform any custom modifications. The code can also be imported into the tool but as HTML / CSS only.
10	Preview	This allows the user to view the designed course in preview mode
11	Custom Blocks / Templates	This allows the users to save their content as custom blocks and templates which can later be reused or shared. Admin/ Course Designer can create and share custom templates/ blocks, but teachers can only create custom blocks.

S. No	Features / Enhancements	Purpose
12	Responsiveness	The responsiveness across browsers and various resolutions has been improved
