3. Introduction

3.1. Purpose & Scope

This release is focuses on key enhancements to the **Loree** tool which were requested by the various Loree Canvas LMS users. As these enhancements mainly focusing on Archiving Templates, Restoring Archived Templates, add pages as a Module items, and responsive special blocks. For more details on the product features that forms a part of this release, refer section 4.

3.2. Release Version

Loree Builder Version 1904.3

3.3. Environment

1. Environment	Desktop web-based tool for Windows and Mac PCs / Laptops
2. Supported Browsers	Safari (Mac only), Chrome, Firefox
3. Pre-Requisites	Valid Instructure-Canvas license Valid Loree Admin console credentials

4. Release Details

4.1 Release Features

S. No	Features / Enhancements	Purpose
1	Archive Templates	Earlier, when Designer delete the templates from My Templates it will be removed permanently. Now the templates will be Archived instead of Delete.
2	Restore Templates	<p>This feature allows the Admins to restore the archived templates via Dashboard. Once it's restored, it will be displayed on the creator account.</p> <p>In the Dashboard Templates Management section, you can find out the Restore column and status on each template.</p>
3	Outline toggle on by Default for teachers view	Loree has disabled the outline toggle icon on simplified view by default. When teachers open Loree, it will be disabled by default. It can be enable/disable at any time.
4	Add Pages as a Modules Items	<p>From 1904.3 onwards, Loree allows the users to add Canvas Course Shell pages as a Module item. This can be done by click on "+" icon from the Loree Modules list.</p> <p>Once you select the page from the list, click on "Add Item" icon to add in list. By click on "Cancel" will discard and close the Add Item Modal.</p>
5	Add one or more pages on Modules list	Loree supports multi-select functionality when adding pages as a Module items. Simply you can click and select the page from the list. By re-click on the selected page from the list will be de-selected.
6	Search and select pages from Add item modal	The search field on Add Module item modal will help the users to filter the pages list by providing page name.
7	Active/Inactive Style Manager properties based on element /content type	<p>Earlier, when you click on any element from Editor window it will display all the style manager properties. Now Loree style manager properties has re-structured based on Content type.</p> <p>When you select an element and if any non-relevant style manager properties are there in the side panel, that will be disappeared.</p> <p>For example, when you select font element it will display the Font section on Side panel. Whereas if you select an Image element, it won't show the Font properties.</p>

S. No	Features / Enhancements	Purpose
8	Removed Visibility on Dashboard	The existing feature Template Visibility option has been removed from Dashboard.
9	Vimeo supports URL on Video elements	Earlier, Loree supports only the Vimeo ID has to be provide in the input field to get the Vimeo video. Now the same has been re-structured and it allows both URL or ID as a valid input.
10	Contextual help icon on Video Modal	The Contextual help icon has been added on Loree Video Media provider modal. By click on the Icon will navigate the users to End User Guide to get more details about the feature.
11	Search on Loree Images	The search functionality on Loree images list has been integrated. So that user can filter the images by using the Loree Image name.

4.2. Change requests included in the release

4.2.1. Functional Change Requests

- Auto collapse/ expand needs to be implement on Loree simplified view
