3. Introduction

3.1. Purpose & Scope

This release is focuses on key enhancements and the additional features to the Loree tool which were requested by the various Loree Canvas LMS users. As these enhancements and new feature implementations mainly focusing on Securing the API calls which we used in Loree to get Canvas contents, Version control for Loree Admin Dashboard, WAF & CloudFront implementation for Loree and bug fixes. For more details on the product features that forms a part of this release, refer section 4.

3.2. Release Version

Loree Builder Version 1904.6

3.3. Environment

1.	Environment	Desktop web-based tool for Windows and Mac PCs / Laptops
2.	Supported Browsers	Safari 12 and above (Mac only), Chrome 76 and above, Firefox 68 and above
3.	Pre-Requisites	Valid Instructure-Canvas license Valid Loree Admin console credentials

4. Release Details

4.1 Release Features

S. No	Features / Enhancements	Purpose
1	Secured API calls for Loree	Using JWT (JSON Web Token) and passport middleware, we have secured Canvas API calls which is requested from Loree. So that the interaction between Canvas and Loree will be more secured.
2	Version Control for Admin Dashboard	From this release onwards, all the new features or enhancements on Loree Dashboard features will be tracked by separate version control. The current version of Loree Dashboard will be v1.0. Note: Current Version number will be shown in Admin Dashboard.
3	WAF & CloudFront control on Loree	Secure on Loree application has been upgraded by using WAF (Web Application Firewall). It typically prevents Loree from attacks such as such as cross-site forgery, cross-site-scripting (XSS), file inclusion, and SQL injection, among others. Amazon CloudFront is a fast content delivery network (CDN) service that securely delivers data, videos, applications, and APIs to customers globally with low latency, high transfer speeds, all within a developer-friendly environment.
4	Updated Loree CSS file for Canvas to Support responsiveness contents	We have removed unwanted CSS from the Loree CSS file. This file can be attached in Canvas Themes to make sure the Loree contents are more responsive on Desktop, Tablet, Mobile portrait and Mobile Landscape. The CSS file should be applied on Canvas current theme.

4.2. Change requests included in the release

4.2.1. Functional Change Requests

- Separate version control for Loree Admin Dashboard.

4.2.2. Defect Fixes

- Issues on fetching Custom fonts has been fixed
  - o **Defect Description:** When toolbar option from Loree Editor Interface has been disabled via Loree dashboard, the custom fonts were not listed on Designer view of Loree.
  - o **Status:** Fixed
- Header on text not changing the header tags in HTML
  - o **Defect Scenario:** By applying header values on text, that doesn't change the HTML tag.
  - o **Status**: Fixed
- Ordered/ Unordered lists are not getting updated
  - o **Defect Scenario:** The Ordered/ Unordered list items can't be modified after Save and Exit and Back to Editor.
  - o **Status**: Fixed

4.3. Resolved Client Bugs

- Infinite loader on Loree pages list when no pages found
  - o **Defect Scenario**: When no pages found in Loree Pages list from Canvas, the infinite loader has loaded. Now this has been restricted.
  - o Hereafter, when no pages found on Canvas courses you will get an alert saying that "No Pages Found".
  - o **Status**: Fixed
